I am in favor of this project and urge the COASTSIDE DESIGN REVIEW COMMITTEE to approve their design project.

Our home is about two hundred feet or so, from this proposed house.

San Mateo County is in great need of increased housing units.

This small, cute and timely in-fill house is a perfect example of what is needed in our County.

There are numerous numbers of '1500-plus sq ft.' homes in our area.

It is probably time to have some smaller footprint homes, too.

In-fill lot owners should be allowed to build on their lots.

I find the proposed design attractive and think it would be a positive addition to our neighborhood in Seal Cove.

Thank you for consideration.
